REPORT NO.

50X1-HUM

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS REPORT IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

1. An ultra short wave amplifying and relay station for the Soviet Union was to have been ready for delivery from the HF Works on 15 Jan 54, but work on it is still in progress. Delivery probably will be four weeks late.
2. A sender-receiver apparatus for aircraft is being developed for Poland. The work is still in the preliminary stage, and it is uncertain whether the HF works will merely do the development work or whether it will undertake the production. It is certain that the equipment is to be used in the Soviet LI-2 plane which, it is reported, will be manufactured under license in Poland.
3. One large and three medium sized electronic microscopes are being manufactured. They represent a development of the known Siemens type. Since the electronic microscope division was established, 81 microscopes have been delivered to the Soviet Union.
